About AL JASOOR

Advanced Vehicles for Tomorrow's Missions.

Modern combat is rapidly changing, driven mainly by asymmetric and hybrid warfare as national armies face an increasingly complex and unpredictable battlefield. Future combat demands an approach informed by lightning-fast insights and intelligence – delivered via flexible and responsive tactics. The safety and survivability of soldiers is a top priority for any military, and AL JASOOR ensures that those on the front lines are protected by a new generation of faster, more mobile and more versatile vehicles with advanced offensive and defensive capabilities.

Part of the Platforms & Systems cluster within EDGE, an advanced technology group for defence and beyond, AL JASOOR is the exclusive supplier of the Rabdan 8x8 Infantry Fighting Vehicle (IFV) and the Rabdan Ambulance that offer unique operational advantages on land and can reliably operate in water. The Rabdan is a next-generation amphibious, modular, multi-wheeled armoured vehicle with superior tactical and technical abilities.

Supplied as a complete built-up unit with the safety of soldiers at its core, the Rabdan comes equipped with a dedicated, long-term after-market customer service package of military-grade integrated logistics support services, courtesy of AL JASOOR, including on-site support for client acceptance, repair, refurbishment and preventive maintenance. A 20-year commitment to the supply of spare parts, technical support, operational and technical training, as well as local retrofitting and customisation to meet a range of rapidly changing mission-critical objectives is also part of the package.

AL JASOOR prides itself on meeting the nation's various armoured vehicle requirements, with a strong vision of manufacturing land platforms aimed at the future needs of the UAE and export markets. As a clear example of the valuable synergies within EDGE, AL JASOOR has established a local assembly line at NIMR facilities which will help the company gain a substantial advantage over its competitors.

AL JASOOR is committed to harnessing advanced technologies and innovations. Its strategic partnership with Otokar Land Systems enables the transfer of technology, training and ownership to ensure that the Rabdan is designed and manufactured to the highest quality. Based on the successful ARMA platform, the 8x8's built-in technology gives it a truly global footprint, as well as significant technology and systems development potential in the years to come. Additionally, the Rabdan's ambulance platform is fully equipped for combat medical emergencies.

AL JASOOR الجسور

Now with defence modernisation programmes accelerating globally, and ageing vehicle fleets being replaced, demand for 8x8 armoured vehicles is set to grow - namely in emerging markets across Asia and the Middle East. With its powerful combination of performance and value, opportunities abound for the Rabdan as a flexible vehicle platform designed for future multi-terrain combat across the region and the wider world.
