# WE ARE CARACAL —

**MISSION-READY HERITAGE.**

CARACAL is a leader in the manufacture of high-performance small arms in the Middle East and North Africa. We design, engineer and manufacture battlefield-proven firearms for use by law enforcement, security and military forces.

Established in Abu Dhabi in 2007, CARACAL has more than 15 years of production heritage as the first firearms manufacturer in the GCC. Our experience is reflected in the quality, performance and reliability of our growing range of weapons developed to meet the evolving and challenging mission requirements of customers in the UAE and internationally.

We are a subsidiary in the Missiles & Weapons cluster of EDGE.

## ABOUT EDGE

We live in an accelerating world. Characterised by uncharted frontiers, the future is empowered by advanced technology that is galvanising a new breed of players. At the edge of these frontiers exist no limits – where boundless opportunities await.

Transforming how we live, and ensuring a more secure future, is what we do. We are EDGE; and our mission is simple: To bring innovative technologies and services to market with greater speed and efficiency.

We will not only revolutionise the defence industry, but we will change its fundamentals. We are the vanguard of the next-generation, of a reimagined sector. We prioritise technology in a non-binary world and seek universal solutions. We work with everyone: big or small, start-up or established, local or global.

We are EDGE. We enable a secure future.

## OUR VALUES

- PERFORMANCE EXCELLENCE
- INTEGRITY
- CUSTOMER FOCUSED
- TRANSPARENCY

## STATEMENT OF PURPOSE

To be an innovative and trusted world-class manufacturer of small arms.

MAINTAINING TRANSPARENT PROCESSES

DEVELOPING PRODUCTS INFORMED BY CLOSE CUSTOMER ENGAGEMENT

BUILDING RELIABLE SUPPLIER PARTNERSHIPS TO ENSURE QUALITY

EMBRACING MANUFACTURING EXCELLENCE

DEVELOPING A COMPETENT AND CAPABLE UAE NATIONAL WORKFORCE

DRIVING INNOVATION THROUGH INVESTMENT IN RESEARCH AND DEVELOPMENT

### ALWAYS RELIABLE.

We design, manufacture, test and assemble small arms from 9mm to 12.7mm calibre, including combat pistols, submachine guns, tactical rifles and sniper rifles.

Each weapon we deliver is manufactured and tested to perform every time, in any circumstance and irrespective of weather or mission conditions. To ensure that those on the front lines have the firepower they require, we continually enhance and update our products with in-house engineers and designers incorporating the latest technological advances, changing customer needs and evolving mission.

### INTERNATIONAL EXPANSION

The international success of CARACAL weapons for civilian, law enforcement and military use has led to the establishment of wholly owned subsidiaries and joint ventures in major markets, including the United States, Germany and Algeria. These companies bring the quality and performance of CARACAL weapons to their respective markets and beyond, while meeting local requirements and preferences. Subsidiaries include:

CARACAL USA

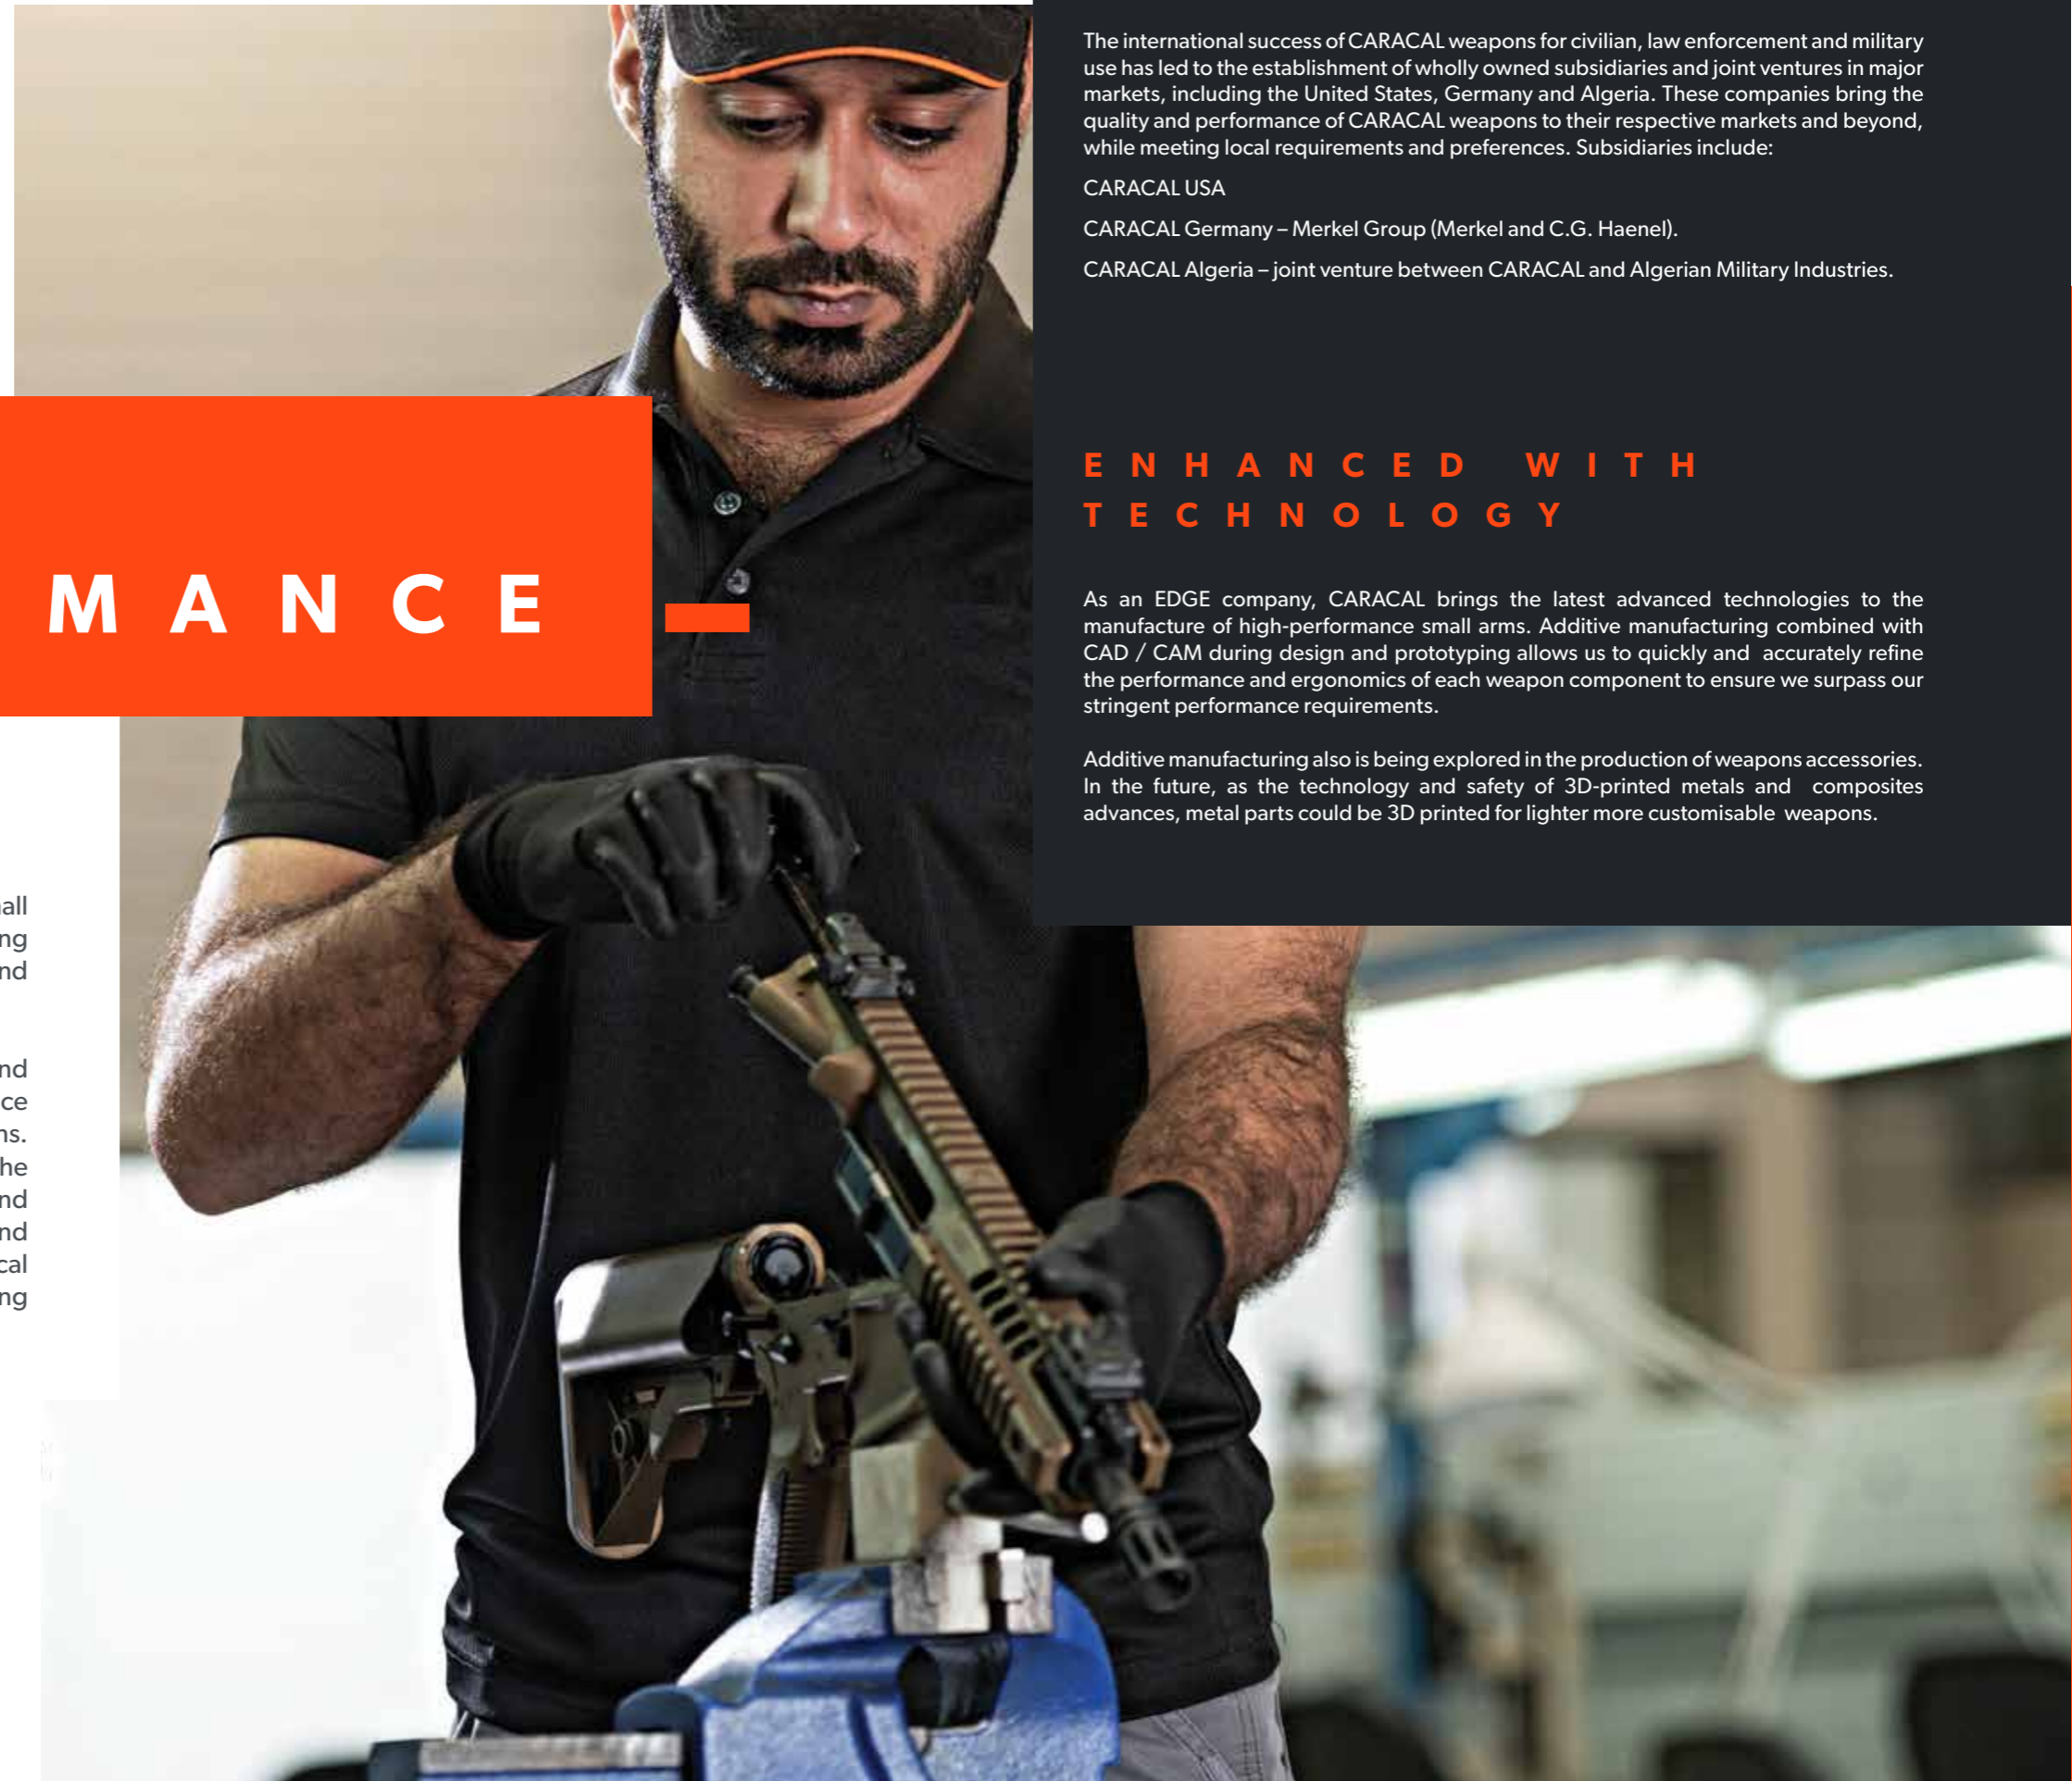

CARACAL Germany – Merkel Group (Merkel and C.G. Haenel).

CARACAL Algeria – joint venture between CARACAL and Algerian Military Industries.

### ENHANCED WITH TECHNOLOGY

As an EDGE company, CARACAL brings the latest advanced technologies to the manufacture of high-performance small arms. Additive manufacturing combined with CAD / CAM during design and prototyping allows us to quickly and accurately refine the performance and ergonomics of each weapon component to ensure we surpass our stringent performance requirements.

Additive manufacturing also is being explored in the production of weapons accessories. In the future, as the technology and safety of 3D-printed metals and composites advances, metal parts could be 3D printed for lighter more customisable weapons.

# FLAWLESS TACTICAL OPERATION

## MANUFACTURED FOR MISSION SUCCESS.

Designed for flawless operation in even the most harshest environments, every CARACAL weapon reflects design features that incorporate ergonomics and the latest requirements.

Performance is further guaranteed by production in state-of-the-art manufacturing facilities that include some of the world's best CNC machines, QC equipment and moulding technologies.

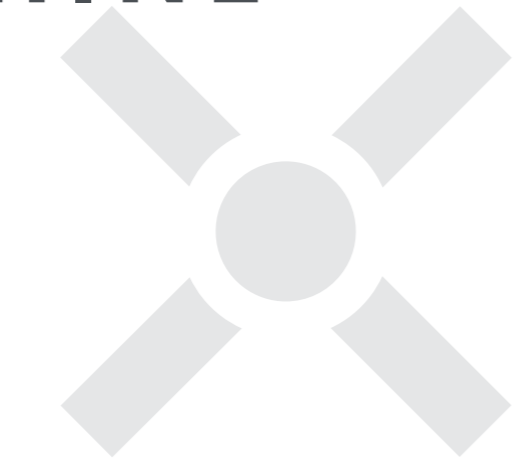

## TESTING AND RELIABILITY

All our weapons are continuously verified against their functional requirements and established specifications.

Additionally, the safety, performance and reliability of our weapons are validated in accordance with NATO, CIP and other applicable military testing procedures. These validation tests ensure the performance of weapons during climatic extremes, adverse conditions, and rough handling situations.

# PISTOLS AND SUB MACHINE GUNS

## CARACAL F Gen II

The 9 X 19 MM CARACAL F Gen II Semi-automatic pistol is being launched in 2021. Gen II went through a rigorous development programme to deliver the most competitive pistol to the end-user. The new pistol comes with a completely new integrated solid slide, an enhanced trigger with improved performance and the adaptation of a Mil-spec picatinny rail (MIL-STD-1913) to allow the attachment of multiple accessories. A modified slide offering the ability to add advanced optics (like reflex sights) is available factory-made.

Gen II has been extensively tested in the harshest conditions to meet recognized standards. It carries a high-capacity 18-round magazine and retains the unique low bore axis found on previous CARACAL pistols.

## CARACAL Enhanced F

The 9 x 19 mm CARACAL Enhanced F semi-automatic pistol was launched in 2015 as a fundamentally new weapon extensively tested against the harshest conditions and recognised standards. It carries a high-capacity 18-round 9mm magazine and retains the unique low-bore axis found on previous CARACAL pistols. Customers can opt for a tactical pack with a QD polymer shoulder stock and forward grip with integrated mounting rail.

## CARACAL CMP 9

The CMP 9 submachine gun is a modern weapon operating an advanced blowback system chambered in 9 x 19 mm calibre. The bolt extends over the barrel for excellent weight distribution and weapon control. The rear ambidextrous charging handle and traditional AR-style fire controls ensure operator familiarity with the weapon system. The CMP 9 is available in multiple configurations for different operational requirements. Barrel lengths and types, handguards, suppressors, stocks and charging handles can all be configured at the operator level.

# ASSAULT RIFLES

## CARACAL CAR 816

The CAR 816 is a centre-fire, rotating-bolt system assault rifle that has an advanced short-stroke pushrod gas-piston system with a three-positions valve, chambered in 5.56 x 45mm NATO. It is designed for high-end law enforcement and military applications. The weapon is available in semi-automatic and select-fire configurations, and available in various barrel lengths (7.5", 10.5" CQB, 14.5" Carbine and 16").

## CARACAL CAR 814

The CAR 814 is a centre-fire, gas-impingement operated assault rifle, chambered in 5.56 x 45mm NATO. The CAR 814 is an assault rifle designed for use in law enforcement and military settings. The weapon is available in semi-automatic and select-fire configurations, and in various barrel lengths (10.5" CQB, 14.5" Carbine and 16").

## CARACAL CAR 817 AR

The CAR 817 AR is a centre-fire, rotating-bolt system assault rifle with an advanced short-stroke pushrod gas-piston system with a user-adjustable multi-position gas valve. It is chambered in 7.62 x 51 mm NATO / .308Win and is designed for high-end law enforcement and military applications. The weapon is available in semi-automatic and select-fire configurations and available in various barrel lengths (12.5", 14.5" and 16" Carbine).

# SNIPER RIFLES

## CARACAL CSA 338

A semi-automatic precision platform that delivers the accuracy of a 338 Lapua Mag. bolt action sniper, but also allows for fast follow-up shots, when the difference between mission success and failure is measured in seconds. The CSA 338 was built from the ground up to the highest requirements of Special Forces for reliable operation in the harshest most unforgiving environments. It utilizes and improves upon the battle proven AR ergonomics, adding an extra level to the familiar intuitive ease of operation. All contact points between the weapon and the user are polymer/rubber covered for a comfortable operation in extreme temperatures.

## CARACAL CSR14.5

The CSR 14.5 is a modern and rugged anti-material precision large caliber rifle system which finds use in all MIL applications in the most demanding environments. Focusing on reliability, safety and operator convenience, the CSR14.5 is a long range rifle was designed for military use only. The CSR14.5 is part of a modern and modular, manual bolt operated dedicated precision rifle family. Its modern design and use of high quality materials and craftsmanship promote excellent accuracy, reliability and durability in the most demanding situations and environments.

Following a family design approach it offers identical operation and ergonomics with its other versions chambered in .308 Win., .338 LM and .50 BMG for ease of use and operator training. The CSR14.5 can be operated by right or left handed users from a multitude of positions, all controls are ambidextrous with the exception of the bolt handle and folding stock hinge. Field stripping of the CSR14.5 for user maintenance can be accomplished without the use of special tools.

## CARACAL CAR 817 DMR

The CAR 817 DMR (Designated Marksman Rifle) is a high-precision semi-automatic, gas-operated, and rotating-bolt system tactical rifle, chambered in 7.62 x 51 mm NATO / .308Win. The CAR 817 DMR is a tactical weapon designed for law enforcement and military applications. The weapon is available in semi-automatic configuration, as well as two barrel lengths: 16" and 18".

## CARACAL CSR 308

## CARACAL CSR 338

## CARACAL CSR 50

## CARACAL CSR Tactical Sniper Family

The CSR family of high-precision, manually operated, bolt-action tactical sniper rifles offers several versions. The CSR 308 is chambered in 7.62 NATO / .308Win. The CSR 338 is chambered in Calibre .338 Lapua Magnum (70 x 8.6 mm). The CSR 50 is chambered in 12.7 x 99 mm NATO and is intended for long-range target engagement.
