

Naser Ali Al Omaira

Special Projects Department Manager, CARACAL

Naser Ali Al Omaira is the Special Projects Manager at CARACAL.

In his role, he leads the special projects team under the Research and Development department that focuses on the customisation of products and accessories and conducts investigative studies for product enhancement and optimisation in the small arms sector.

Naser has over fifteen years of extensive expertise in electronics, renewable energy, as well as design and additive manufacturing.

In addition to CARACAL, Naser was previously the General Manager at the Automobile & Touring Club UAE, where he managed day to day operations and activities. Prior to that, Naser worked at the Executive Council of Dubai as an associate project manager for the renewable energy sector. He has also been active in the technology and design fields, offering IT solutions through his company Arabian-Tech and obtains multiple innovative designs related to PCP rifles and 3D Printing.

Naser holds a BTEC First Diploma in Electronics and Communication from Emirates Aviation University, UAE.
