

Saeed Al Shamsi

Acting Chief Executive Officer, HALCON

Saeed Al Shamsi is the Acting Chief Executive Officer of HALCON, an EDGE entity within the Missiles & Weapons cluster, dedicated to the design and production of missiles and guided weapon systems.

In his current role, Al Shamsi is responsible for the creation and implementation of HALCON's strategic vision, and the management of its operations and resources. Additionally, he plays a critical role in fostering and ensuring key stakeholder relationships, managing business opportunities with industry partners, and administering day-to-day operations.

With extensive experience in smart weapons and defence technologies, Al Shamsi's career spans 13 years in the development of multiple missiles and guided munitions programmes.

Al Shamsi joined HALCON in 2018 to lead the development of navigation systems. In 2023, he was appointed to lead the Missile Subsystems Division following the establishment of the Strategic Engineering Centre. Prior to joining HALCON, he served as an Engineer at Tawazun Dynamics and took part in various engineering development activities for the AL TARIQ precision-guided munition.

Al Shamsi holds a master's degree in Mechatronics Engineering and a bachelor's degree in Mechanical Engineering from the American University of Sharjah, UAE.
